DETAILED ACTION

Response to Arguments

Applicant's arguments, see page 1, filed August 17, 2007, with respect to the rejections of claims 1-37 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Starobin et al. (US 6,361,503 B1).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 32 disclose the limitation "measure of cardiac ischemia during stimulation". It is unclear what type of stimulation and when it is applied to the patient.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 35-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Starobin et al. (US 6,361,503 B1). Starobin et al. discloses a computer comparing a first

set of RR interval data set to a second set of RR interval data set wherein a greater difference between the first and second data sets indicates greater cardiac ischemia and lesser cardiovascular health in the subject.
